

Utility Right of Way Management Program
Current Specifications for Plan Submittal
Last Updated: 11/29/07

Plans should include:

- Drawings to relative scale submitted on 8 ½ x 11 media or digital format (PDF format)
- Label all street names
- Right of Way Lines (if installation is located between curb and property line)
- Travel lanes, curb/gutter, planting strip, trees, driveways & sidewalks
- Existing utilities (that can reasonably be determined through site investigation)
- Identify all signalized intersections
- Location of proposed installation (measurement from edge of pavement, curb line or r/w line)
- Method of construction (open trench, directional bore or jack & bore)
- Bore pit locations
- Provide handhole/manhole detail
- Provide traffic control plan
